## PREFACE.

---

This volume is Number 3, of a series, making "AN ALPHABETICAL INDEX OF THE BIRTHS, MARRIAGES, AND DEATHS, RECORDED IN PROVIDENCE, R. I."

This *Third Volume* contains the names of all the persons whose deaths are recorded in the city of Providence, during the twenty years, from 1851 to 1870 inclusive.

This book contains 23,925 names of persons whose deaths are recorded in the "records of deaths" in Providence, beginning on page 18, of volume IX, and ending on page 191, of volume XII. It also contains 48 names from volume V; but all persons whose names are found in this volume, died between January 1, 1851, and December 31, 1870, inclusive.

The records of deaths in Providence, from 1840 to 1855, were much more complete than the records of births, or of marriages, and it is probable that, during the most of this period, nearly all the deaths in the city were recorded, with a considerable number which occurred in other places. But though the whole number is tolerably full, there are many mistakes and omissions in the particulars given of individual decedents. From the year 1851, when this volume begins, there was a considerable improvement in the records of deaths; and since 1855, when the office of City Registrar was established, the records of deaths in Providence have been almost entirely complete, certainly as much as those of any other city in this country.

The table on the next page shows the number of decedents, including still-born and non-residents, whose names are recorded in Providence, for each of the twenty years, from 1851 to 1870, inclusive.

The column of "*total deaths*," in this table, gives the total number of deaths recorded for each year, and includes the other two columns of still-born and non-resident.

The column of "*still-born*" includes all those recorded, whether the still-birth occurred in the city, or elsewhere. Some of the still-born in this column are also included in the column of non-residents.

The column of "*non-resident*" shows the number of deaths and still-births that are recorded in the city, which occurred in other places. This column includes a large number of deaths that occurred in the territory just outside of the city limits, in the towns of Cranston, and North Providence. This territory has since been annexed to the city.

At the close of this volume, a table is given, showing the "Number of names in this book under each letter of the Alphabet;" also, a list of "Family names spelled in different ways."

The Fourth Volume is ready for the press, containing an Alphabetical index of the names of all the *children born* in the city of Providence, from 1851 to 1870 inclusive.
